

Historic, Archive Document

Do not assume content reflects current scientific knowledge, policies, or practices.

Only varieties herein listed are available for spring of 1947.
A few varieties described are now sold out.

Fruit Department

Marshall's fruit trees are grown by the "Cut-Back" method and are mostly 3 years in nursery instead of 2 years. They have limb framework and root system much superior to ordinary trees, and come into bearing early. See Handbook, Page 3.

SELECT GRADE is a first class, fully headed tree two and three years old, 5 to 7 feet high, except cherries which run 4 to 6 feet in height.

STANDARD GRADE is a standard size tree propagated from the same selected parent stock, -- has established head (limb structure) in most varieties.

JUMBO SIZE is an extra heavy 3 year old tree with full limb structure.

SHRUBS

ONLY VARIETIES LISTED BELOW ARE AVAILABLE

SPECIMEN GRADE is the larger well-branched, heavy shrubs out of the three year old blocks.

The STANDARD GRADE is the usual size sold by most nurseries. The stock has all been transplanted and grown in wide spacing for one and two years.

For LANDSCAPE planting where immediate effect is desired, we have in most varieties a special pack, selected and reserved for those who want the best plants available for quick effect for a landscape planting. This grade runs in price from \$2.50 and up each, -- to be sold only on special inquiries, or by landscape men acquainted and informed as to available stock.

**We Pay Transportation Charges
and Replace Free of Charge, Stock
That Fails to Grow**

We know of no other nursery, selling by catalog in the West, that prepays transportation on all classes of stock, and gives full free replacement guarantee. We also want to emphasize that we are constantly looking for better individual trees and plants, and when found we secure wood from these particular specimens for propagation.
